

INSTAGRAM FOR RESTAURANTS

Have you seen what restaurants are doing on Instagram?
View our Instagram for restaurants video. Click on the above picture.

You may think Instagram and other social media is for kids, but take a second look. There is a massive local audience waiting to hear from you, and you can entice them to order with the right campaign.

I can prove it if you follow these steps:

- Simply download the Instagram App to your phone
- Create a profile for your store
- Switch it to a business profile
- Add the reservation button
- And start posting pictures of your food

That's it!

It will take a few weeks for you to build an audience, but once you do, you'll start to see increasing engagement with your products.

You can manage this yourself if you have the time...
However, if you don't have the time, I can set you up and manage everything.

Normally my setup fee is \$500, but if you reply with "yes, I'm interested" today, I will analyze your online presence no charge, in addition I offer a 50% setup discount.

For the small fee of \$250 I will have you up and running in a day or two.

Afterwards, you just keep supplying pictures of your delicious food, and we will keep attracting local customers to your postings on a month to month agreement.

Please let me know if you'd like me to set this up for you as soon as possible, I'd really like to work with you because you want your business to keep growing, and you deserve service that is second to none.
